PROFESSIONAL SUMMARY

Frontend engineer with 3 years of production experience building high-performance React applications at enterprise scale. Shipped core e-commerce features — including PLP, PDP, cart, and payment flows — for Verizon's Visible platform. Reduced page load time by 30% and eliminated 40% of manual QA effort by designing an LLM-powered test automation framework. TypeScript-first developer with a strong focus on reusable component architecture, accessibility, and measurable performance outcomes. Comfortable collaborating across backend, design, and DevOps teams.

CORE COMPETENCIES

React.js · TypeScript · JavaScript · HTML5 · CSS3 · Responsive Design · Accessibility (WCAG) · REST API Integration · Performance Optimization · Component Architecture · Unit Testing (Jest) · LLM-based Test Automation · Agile / Scrum

WORK EXPERIENCE

Associate Software Engineer — Frontend | Infinite Computer Solutions (Client: Verizon) | Hyderabad
Aug 2023 – Present

Project: VISIBLE — Verizon E-Commerce Platform *Dec 2025 – Mar 2026*

- Engineered responsive PLP and PDP pages for Verizon's Visible platform, driving a 25% lift in user engagement across web and mobile.
- Optimized React component rendering and asset delivery, cutting page load time by 30% and improving Core Web Vitals scores.
- Built end-to-end cart, EMI options, and payment integration flows, delivering a seamless checkout experience across browsers and devices.
- Implemented Figma designs with cross-browser and cross-device consistency, validated across Chrome, Safari, Firefox, iOS, and Android.
- Integrated 10+ REST API endpoints for real-time product data rendering and third-party service connectivity.

Project: ELVIS — Customer Experience Platform *Aug 2024 – Nov 2025*

- Architected a library of reusable React/TypeScript components adopted across multiple internal product teams.
- Improved application performance, responsiveness, and WCAG accessibility compliance through systematic UI audits.
- Enhanced customer financing workflows, reducing user drop-off by simplifying multi-step form interactions.
- Collaborated with backend engineers on REST API contracts; participated in sprint planning, code reviews, and retrospectives.

Project: SRE — Site Reliability & Full-Stack Development *Aug 2023 – Aug 2024*

- Designed and deployed an LLM-powered unit test generation framework, eliminating 40% of manual QA effort across the team.
- Developed REST APIs using Java, Python, and MySQL to support internal reliability and monitoring tooling.
- Built a full-stack Library Management System (React.js + chatbot integration) and a secure Employee Management System with CRUD operations.
- Supported incident management and observability using Elasticsearch and Kibana dashboards.

TECHNICAL SKILLS

Frontend (Primary): React.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Streamlit
Testing & Automation: Jest, LLM-based Test Automation, Unit & Integration Testing

Backend & APIs: Java, Spring Boot, Python, RESTful APIs
Databases: MySQL, MongoDB, Elasticsearch
DevOps & Tooling: Docker, Jenkins, GitLab CI/CD, AWS, Kibana, SonarQube
Project Management: Jira, Git, VS Code, GitHub Copilot
Operating Systems: Windows, macOS, Linux
AI Tools: OpenAI (ChatGPT), Google Gemini AI, GitHub Copilot, Claude Sonet and Opus 4.6

EDUCATION

B.Tech in Computer Science | Swarna Bharathi Institute of Science and Technology | Telangana*2019 – 2023*
CGPA: 7.9 / 10.0

CERTIFICATIONS

- TCS Career Edge — Young Professional
- Data Visualization with Python — Swecha Organization
- Cloud Computing Certification — Solvency Software Solutions

INTERNSHIPS

- Java Backend Development — Pioneer Business Solutions (Sep 2023 – Nov 2023)
- Data Science Intern — Swecha Organization (May 2022 – Jun 2022)
- Cloud Computing Intern — Solvency Software Solutions (Dec 2021 – Feb 2022)

ACADEMIC & SIDE PROJECTS

- CRM Web Application (Capstone, 2023) — Built e-commerce platform with product browsing, ticketing, and FAQ management.
- Automating E-Government Services with AI/ML (2022–23) — Major project applying ML models to streamline government service workflows.
- Library Management System (2023–24) — Full-stack system with React.js, REST APIs, and integrated chatbot support.
